## Sponsorships

Our sponsors are a vital and instrumental part of the program because they give opportunities that would not have been possible otherwise. Often times students have the drive but not the means. By sponsoring someone you are giving them a second chance to succeed in life and achieving a lifelong goal of earning their high school diploma. This program increases self-esteem, value and instills a fresh, wholesome quality that adds brilliance and an inner light that shines brighter than most stars. Our sponsors get a chance to be a part of giving them a ***fresh start for a fresh future*** by their generous gifts and donations.

## How Collective Efforts Can Change Lives

According to the NEA (National Education Association) only about 68 percent of all students nationally who enter 9th grade will graduate "on time" with regular diplomas in 12th grade. While the graduation rate for White students is 75 percent, only approximately half of Black, Latino, and Native American students earn regular diplomas alongside their classmates. Graduation rates are even lower for minority males.

Literacy and lack of second chances affect our entire country through increased crime rates, unemployment rates, decreased self-esteem, pride in life, and value on life.

We are a faith based organization that believes in holistic empowerment. Our program is designed and tailored to address the educational, mental and emotional issues that are associated with none completion a high school level education.

We are unique in that our focus is mentorship through education. It has been statistically

proven that education alone will not repair the damage to the psyche. Realizing ones self-worth is the only thing that can restore that. We desire to work together with community and business leaders to help spread the word about the importance of literacy and a second chance in life. Abundant living begins in the heart and extends out to core life. It is this increase in core life that increases who we are as a whole thus adding value to our society as a whole.

Collective efforts minimize the amount of energy each person has to put in to produce miraculous results. In working together we can pool our resources and help change more lives in a diminutive amount of time. This will transform and transcend people to greater heights and deeper depths. It is only through collective efforts that we really get quick and exponential growth desired to propel people to afresh wholesome quality that will truly change core lives.
